To showcase the page layout and style flexibility of Tiki CMS, the themes.tikiwiki.org site has been created to offer theme demos, discussions and downloads. Tiki users are encouraged to contribute their creations, and are welcomed to the site to get advice or to help others with problems.

To participate at themes.tikiwiki.org, please register at [\[link\]](#) if you have not already done so. This site will use the [\[link\]](#) feature to get user preferences and group membership from tikiwiki.org.

Users here can [\[link\]](#) contributed themes directly to the theme submission file gallery and can make appropriate wiki pages, etc. [\[link\]](#) us for more information.

This site, we hope, will become a hub for both free and commercial Tiki design projects.
