Andreas09 is ready for TikiWiki 1.10. The files can be downloaded from   . This is an update of the port of the   ↗ design. See a demo at   ↗.

The theme files are also at mods.tikiwiki.org so the theme can be installed using the Admin Mods feature if that is available at the site (shell access needed).

Like the other updated or new themes for 1.10, Andreas09 supports the Look & Feel options and other new features. The theme files will be updated regularly as Tiki 1.10 progresses.
